## Pro App

Modern Security Tools for iPhone & iPad

### GeoC Pro App

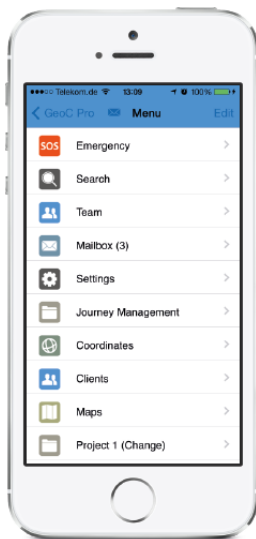

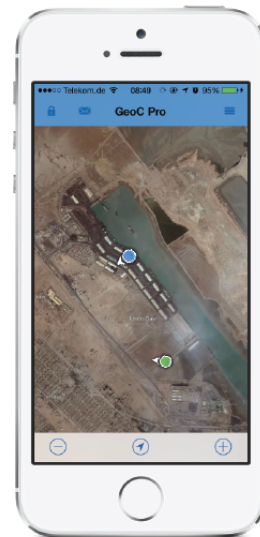

The Pro app is an award winning software available for iPhone, iPad, and iPad Mini. The app has been designed to meet the complex requirements of companies and organizations operating in remote and hostile environment.

The Pro App is the response to the increasing demand for interactivity, information exchange, visibility, mobility and modern technology. It interacts seamlessly with your Ops Room and other devices of the the GeoC platform (GPRS and satellite trackers). The app has been optimized to operate in low bandwidth EDGE/GPRS environments. Pre-stored information and an intelligent synchronization process enable your team leaders, managers, engineers or travelers stay connected in places with minimum GSM coverage. Relevant information can be exchanged between user within seconds.

Tracking, monitoring, and managing is convenient and very user friendly. Country or project related visibility and information exchange can be configured to meet any operational requirement.

The Pro App is in use by well-known international security providers, Risk & Crisis Management companies, western embassies and humanitarian organizations.

Please contact us for more information or a platform demonstration.

### Features at a glance:

- Real-time and motion-based tracking and monitoring (mobile Ops Room)
- Mission-critical offline mapping and online satellite imagery
- Secure multi-directional instant messaging
- Emergency notification, advanced geofencing and speeding alerts
- Shared geo-database and geo-layering and spot system
- Journey management with tasks, team members, clients and vehicles
- GIS tools (spots, areas, tracks, paths)
- GPS tools (heading, bearing, course, orientation, coordinates, distance, etc.)
- Privacy policy and HSE compliant
