GSM/GPRS Personal Tracker

PT Tracker

The PT handheld GSM/GPRS handheld tracker is a reliable, low-profile, field-approved and cost effective device. It has accomplished thousand of hours of operation under the most demanding conditions.

The PT is support continious tracking via GSM or GPRS, sending location reports to your Ops Room in pre-configured intervals. Emergency notifications can be activated on the device sending a distress signal within seconds to your Headquarter and allowing your security personnel to take action before the situation becomes critical.

The man-down feature provides additional safety for remote, lone workers.

The device offers numerous configuration options to meet complex requirements such as parking alerts, movement alerts, geofencing, speeding and automatic status reports via SMS in case the GPRS service is not available.

In the case of an emergency, the device automatically can establish a phone call to your Ops Room allowing the user to inform the Ops Room about the incident.

Features at a glance:

- Real-time tracking
- Dedicated low-pro and easy to carry unit
- Fully privacy policy compliant
- Emergency notification, advanced geofencing and speeding alerts
- Core phone functions (4 programmable keys to establish phone calls)
- Man-down alert
- Long battery life (standard cellphone battery, easy to exchange)
- Low weight (80 g)
- Easy to deploy, all devices are delivered pre-programmed
